

03 Course: Treating the Surgical Patient

Modality: Self-Paced Learning

Duration:

The Treating the Surgical Patient course is designed to provide students with a comprehensive understanding of the principles and practices of patient care in the surgical setting. Students will learn about the preoperative, intraoperative, and postoperative care of surgical patients, including the management of anesthesia, pain, and wound healing. They will also gain knowledge about surgical procedures, surgical instrumentation, and sterile technique. This course will equip students with the skills to provide safe and effective care to surgical patients and enable them to contribute effectively as members of the surgical team.
