

04 Course: Surgical Skills

Modality: Self-Paced Learning

Duration:

The Surgical Skills course is designed to provide students with hands-on training in surgical techniques and procedures. Students will learn about the different types of surgical instruments and how to handle them safely and effectively. They will also learn about surgical suturing, knot tying, and other basic surgical skills. As the course progresses, students will gain proficiency in more advanced surgical techniques, such as laparoscopic surgery and microsurgery. This course will provide students with the practical skills and knowledge necessary to perform surgery safely and effectively, and will prepare them for a career in surgical medicine.
