

03 Course: Specimen Collection

Modality: Self-Paced Learning

Duration:

"Specimen Collection" is a specialized course tailored to equip students with the expertise necessary for proficient and safe collection of medical specimens. This comprehensive program encompasses a wide range of specimen types, including blood, urine, sputum, and more. Participants will develop essential skills in specimen identification, handling, transportation, and storage, adhering to industry best practices and infection control protocols. Upon completion of the course, students will be well-prepared to pursue careers as skilled specimen collectors in hospitals, laboratories, and healthcare facilities."
