

04 Course: Specimen Handling

Modality: Self-Paced Learning

Duration:

"Specimen Handling" is a focused course that delves into the crucial aspect of managing medical specimens with precision and care. Participants will gain comprehensive knowledge of the proper techniques for receiving, labeling, and storing various types of biological samples. Through hands-on training, students will learn to maintain the integrity of specimens and ensure accurate test results by following standardized protocols and safety measures. This course is designed to prepare individuals for careers as skilled specimen handlers, contributing to the efficiency and accuracy of laboratory operations in healthcare settings.
